

WOTS - About App ERDs

Table: AUTH_USER (Form 1)

Keys / Constraints	Field Name	Data Type	Notes / Limits	Description
PK	id	BigInt	Auto-increment	Primary key for the user model

Table: POST (Form 1)

Keys / Constraints	Field Name	Data Type	Notes / Limits	Description
PK	id	BigInt	Auto-increment	Primary key for the post
UK	title	VarChar	Max length: 200, Unique	Post title (enforced unique)
UK	slug	VarChar	Max length: 200, Unique	URL-friendly slug (enforced unique)
FK	author_id	BigInt	Not Null	Foreign key referencing AUTH_USER(id)

Table: COLLABORATE_REQUEST (Form 2)

Keys / Constraints	Field Name	Data Type	Notes / Limits	Description
--------------------	------------	-----------	----------------	-------------

PK	id	BigInt	Auto-increment	Auto-generated primary key
—	name	VarChar	Max length: 200	Requester's name
—	email	VarChar	Max length: 254	Requester's email address
—	message	Text	—	Collaboration request message content
—	read	Boolean	Default: false	Indicates whether the request has been reviewed

Table: ABOUT (Form 3)

Keys / Constraints	Field Name	Data Type	Notes / Limits	Description
PK	id	BigInt	Auto-increment	Auto-generated primary key
—	title	VarChar	Max length: 200	Stores the About page title
Not Null	updated_on	DateTime	Auto-updated	Refreshed automatically whenever an About record is saved
—	content	Text	—	About page content body
Default	profile_image	VarChar	Max length: 255, Default: 'placeholder'	Stores Cloudinary image value

Table: ABOUT (Form 4 - Updated State)

Keys /	Field Name	Data Type	Notes / Limits	Description
--------	------------	-----------	----------------	-------------

Constraints				
PK	id	BigInt	Auto-increment	Auto-generated primary key
UK	title	VarChar	Max length: 200, Unique	Stores the About page title (enforces uniqueness as of migration 0004)
Not Null	updated_on	DateTime	Auto-updated	Refreshed automatically whenever an About record is saved
—	content	Text	—	About page content body
Default	profile_image	VarChar	Max length: 255, Default: 'placeholder'	Stores Cloudinary image value

2. Relationships

Source Entity	Relationship	Target Entity	Cardinality	On Delete Action	Details
AUTH_USER	Authors	POST	1 : N (One-to-Many)	CASCADE	One AUTH_USER can author zero or many POST records. Every POST belongs to exactly one AUTH_USER via author_id. Deleting a user cascades to delete their posts.

COLLABORAT E_REQUEST	None	None	N/A	N/A	Standalone table with no foreign key relationships.
ABOUT	None	None	N/A	N/A	Standalone table with no foreign key relationships.
